3. What assessment or examination adjustments consideration would you recommend as

Reasonable adjustments in assessment

Access arrangements and reasonable adjustments (AARA)

Access arrangements and reasonable adjustments (AARA) are provided to minimise barriers for a student whose disability or medical condition may affect their ability to read, respond to or participate in assessment on the same basis as other students.

Decisions about AARA are considered on a case-by-case basis, based on the evidence and the functional impact of the disability, medical condition, or other circumstance.

Examples of AARA

The following is not a prescriptive list of adjustments or impacts relevant to particular diagnoses, or an exhaustive list of possible conditions or circumstances to which AARA may be applied. The following table is designed to provide information and prompts for schools to make decisions to support their individual student's needs.

| Possible impacts / barriers | Possible assessment AARA |
|--|---|
| Accessing visual information | Alternative format papers (e.g. enlarged print, electronic format) Assistive technology |
| Attending to verbal instructions | Assistance (e.g. supervisor using the student's name in reading assessment instructions) Individual instructions |
| Colour vision deficiency | Alternate format papers, i.e. black and white, where required |
| Epileptic seizure risk (i.e. diagnosed condition) | Medication |
| Focus, concentration, processing speed, working memory, 'cognitive load' | Extra time |
| Hearing verbal instructions | Assistance (e.g. supervisor using the student's name in reading assessment instructions and/or prompting the student to start or continue the assessment task) Individual instructions Varied seating |
| Diabetes (Type 1) monitoring / correcting blood glucose levels | Diabetes management |

| Possible impacts / barriers | Possible assessment AARA |
|--|--|
| Pain, discomfort, fatigue — in producing written responses | Computer or scribe Medication |
| Pain, discomfort, fatigue — in sitting for long periods | Physical equipment Medication |
| Poor fine motor control, illegible handwriting | Computer or assistive technology |
| Regulating emotions, sensory processing | Varied seating Assistance (e.g. supervisor to provide support and reassurance) Rest breaks |
| Restrictive or repetitive activities/behaviours, executive functioning, processing differences, emotional regulation | Varied seatingAssistanceIndividual instructionsExtra time |
| Visual strain | Rest breaks |
| Written expression | Computer, assistive technology |
